DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-12 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no written description of "in sufficient quantity" in the specification. In addition, claim 9 recites "fresh material". There is no description of "fresh material" in the specification.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-12 recite the limitation "the ensilaged material" in claim 1 lines 5-6. There is insufficient antecedent basis for this limitation in the claim.

Claims 1-6 recite the limitation "the material" in claim 1 line 2. There is insufficient antecedent basis for this limitation in the claim.

Art Unit: 1616

Claim 3 recites the limitation "the crop material" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 3 is also unclear since it recites that "compound is applied to per gram fresh weight". The claim does not include the object to which the compound is being applied to. It appears that the compound is being applied to "forage".

Election Status

The Election Requirement is withdrawn.
